CETA Eligibility Estimates by Prime Sponsorship Area

EMPLOYMENT AND UNEMPLOYMENT IN TEXAS

The average number of people either working or seeking jobs in Texas rose by 332,700 between 1980 and 1981, as the annual average civilian labor force totaled 7,074,500 in 1981. Employment rose by 311,600 over the year, averaging 6,701,400 in 1981. While the number of jobless persons in the State increased over the year by some 21,100, concurrent expansion of the labor force kept the unemployment rate at 5.3 percent in 1981 compared to 5.2 percent in 1980.

Nonagricultural wage and salary employment in Texas climbed by five percent between 1980 and 1981, as an additional 292,900 jobs pushed the average in 1981 to 6,144,100. Approximately 83 percent of the over-the-year increase was generated by nonmanufacturing industries, where 242,400 new jobs were created. Over 71,000 new positions were reported in the trade segment, with retail trade contributing 70 percent of these.

Services rose by almost 70,000 between 1980 and 1981, pushed upward by large increases in business and repair services and in health services. Over 47,000 new jobs occurred in mining on the strength of sizeable gains in the oil and gas extraction portion. Smaller but still significant advances were also recorded in transportation and public utilities; finance, insurance, and real estate; and in government.

While manufacturing industries did not record as substantial gains as the nonmanufacturing sector, the factory segment did show overall improvement. Despite losses over the year in electric and electronic equipment, the durable goods segment gained some 36,600 new jobs between 1980 and 1981. Most of this expansion was centered in nonelectrical machinery, which gained 27,200 new positions.

Declines in apparel and other finished textile products and in textile mill products kept the overall increase in nondurable goods to 13,900, although several other segments showed substantial growth. Petroleum refining had the largest numerical increase in nondurable goods, with some 5,600 additional jobs. Printing and publishing also showed healthy growth, as did chemicals and allied products and leather and leather products.

EMPLOYMENT AND UNEMPLOYMENT IN TEXAS' SMSA'S

Although unemployment was up moderately over the year in the majority of the State's 25 major labor market areas, all SMSA's did show employment increases between 1980 and 1981. These increases ranged from a minimal gain of 250 in Texarkana to over 100,000 in Houston and 68,400 in Dallas-Fort Worth. These two largest SMSA's together contributed more than half of the total annual Statewide growth in employment. Other SMSA's with substantial employment gains were San Antonio, Midland, Odessa, and McAllen-Pharr-Edinburg.

The Austin SMSA not only had the third largest gain in employment in the State but also showed a small decrease in unemployment, reversing the trend shown among the majority of the SMSA's. The largest decrease in unemployment between 1980 and 1981 was recorded in the Waco SMSA, where the number of jobless declined by 500. The Longview-Marshall SMSA and the Killeen-Temple SMSA also had decreases in unemployment. The number of unemployed remained unchanged over the year in the Tyler SMSA.

Explanation of CETA Eligibility Estimates

The following estimates of CETA Eligibility were prepared in accordance with guidelines provided by the U. S. Department of Labor for the development of labor market information needed for CETA planning purposes.

General population projections were provided by the Lawrence Berkeley Laboratories, Berkeley, California. All other estimates were prepared by the Economic Research and Analysis Department of the Texas Employment Commission, using the Employment Security Automated Reporting System (ESARS) Table 94, Analysis of Applicant Population by County.

The assumption made in using these data was that characteristics of certain groups of ES applicants would be useful in estimating the characteristics of those eligible for CETA programs. Estimates of those receiving AFDC or State or local assistance were projected from data provided TEC by the Texas Department of Human Resources.

In those cases where the Prime Sponsorship area was composed of sub-county entities (cities), it was not always possible to provide data for that specific area. Generally, when the sub-county area made up at least 50 percent of the entire county's population, the whole county is included in the data.

Specifically, the following Prime Sponsorships' definitions were changed to include or exclude certain portions:

City of Dallas -- no data provided
Dallas County Consortium -- changed to include entire county, including the City of Dallas
Fort Worth Consortium -- changed to include Tarrant County as a whole
City of Houston -- no data provided, changed to include entire county
South Plains Association of Governments -- changed to include all of Lubbock County
Texas Panhandle Employment & Training Alliance Consortium -- changed to include all of Potter and Hutchinson Counties, excludes Randall County
Balance of State -- all of Collin County is included; Hutchinson, Lubbock, and Potter Counties are excluded, and Randall County is included in its entirety.
